

PRE-HOSPITAL KITS

FOR ALL EMERGENCY SCENARIOS

NEANN kits achieved their pre-eminence in the Australian Market by meticulous attention to detail and unrelenting continuous improvement.

Effectiveness commences at the design stage. All kits are customisable to correspond to Services' protocols matching the varying requirements for Resuscitation, Trauma, Airways, Drugs and more.

- ✓ **Best quality materials**
In daily use, impervious materials make NEANN kits easy to maintain, de-contaminate and if necessary fully launder.
- ✓ **No search and select issues**
Being laid out in a uniform manner eliminates search and select issues for the paramedic in the field by having each item presented in the order of use. The bag layouts are configured and designed to meet individual Service Protocols.
- ✓ **Minimised risk of contamination**
NEANN's newly developed revolutionary material, EnvironFrei minimises the chance of cross contamination as it reduces the chance of micro-organisms being resident in the fabric. The internal design is now, where possible, predominantly made from coated fabric and has all items secured in place, which also aids in managing cross contamination when the kits are in use.
- ✓ **Ergonomically designed**
Ergonomically designed from the beginning to ensure maximum safety for the paramedic by reduction of back and related manual handling injuries and other OH&S issues such as positioning of sharps containers.
- ✓ **Prevents overstocking**
With a place for everything and everything in its place, overstocking is virtually eliminated and missing items are immediately apparent providing greater reliability for the kit.
- ✓ **Easy to use**
Proven 24/7 use for over five years offers extraordinary long life.

EQUIPMENT CONSISTENCY • LONG LASTING KITS
CUSTOMISABLE • ELIMINATING OVERSTOCKING ISSUES

WWW.NEANN.COM.AU

is a division of RAPP Australia Pty Ltd

Pre-eminent supplier of pre-hospital emergency and rescue equipment for First Responder, Ambulance and Fire Services since 1983

Provider of ancillary emergency products for all emergency situations including military, mining, diving and other recreational activities

Shared Goals

We share with almost all of our customers these three foundation goals:

- Effectiveness
- Reliability and
- Safety of use

We make it our business to help our customers to achieve their goals

Shared Achievement

We successfully work with our customers to ensure that they can provide the most appropriate equipment and supplies to their personnel, both professional and volunteer, to assist them to complete their tasks successfully and ensure they return safely

Future Commitment

To maintain our leadership position we commit to:

- continuously apply innovation to our existing products,
- work with our our customers' design teams to develop new products
- constantly search the world for latest best-practice, and introduce those which fit as soon as practicable
